

Line Piercing Valve

PRODUCT

MAC-The Ultimate in Line Piercing Valves

PURPOSE

Piercing and servicing line tap valve

APPLICATION

The DiversiTech® QTM-1 1/4, 5/16, 3/8 in. OD tube size MAC line piercing valve tool features one connection for piercing and servicing. The needle automatically back-seats after servicing which leaves the line free of restriction. Connects to tubing with two socket-head screws. When hose is removed, spring loaded needle back-seats forming a leak proof seal. Needle depressor is discarded and wing cap forms extra precautionary seal.

FEATURES

- 1 connection for piercing and servicing.
- Built-in depressor allows for system to be serviced with any charging hose
- After servicing, needle automatically back-seats, leaving line 100% free of restrictions
- Sealed with refrigerant resistant O-rings
- Provides leak proof seal
- Easy to use and install

GENERAL SPECIFICATIONS

- Temperature Max: 300°F
- Pressure Max: 300 PSI
