- Ideal for routine maintenance schedules

Concentrate

Condensate
pump safe

All our concentrates are perfect for use with both the 8 litre HydroSprayer & 15 litre HydroSprayer Elite, only from Advanced.

"One of our most environmentally friendly products from the Advanced range"

NSF[®]

Nonfood Compounds
Program Listed

*Safe to use in food preparation or food storage areas

When you choose a product certified by NSF, it is letting you know the company complies with strict standards and procedures imposed by NSF. From extensive product testing and material analyses to unannounced plant inspections, every aspect of a product's development is thoroughly evaluated before it can earn an NSF certification.

Products eligible for NSF Registration include all compounds used in and around food establishments (nonfood compounds), such as disinfectants and lubricants, and those used for pre-processing of food substances, such as fruits/vegetable washing agents. **NSF Registration assures inspection officials and end users that formulation and labels meet appropriate food safety regulations.**

VerteX®

The NEW industry standard universal coil cleaner.

(but don't just take our word for it)

This is what contractors are saying about the qualities of VerteX®

Cleaning Power

"We used **VerteX** yesterday on some commercial condenser coils in kitchens and outside. IT WORKS GREAT!! You can see the grease and junk falling off the coil as you wait. Then the rinse really gets it out. I will be a buyer."

Easy to use

"I always find it dilutes easily and it's great that it can change to either an Acid or Alkali cleaner – it also smells good too, which is a bonus!"

Environmental

"As a company we try to be environmentally aware, We have been using EnviroCoil for years, I really like the fact that **VerteX** is environmentally friendly & pH neutral, so I know it is safe for the coil and safe if our engineers on site."

"We started using VerteX after being introduced to it at a trade show, having a lot of systems close to airports and coastal environments we have a lot of specially treated coils, in previous years we found some of the older coil cleaners very strong and in some cases actually stripping the protective coatings. Using **VerteX** gives us the same cleaning results but with the peace of mind that the coils are not being damaged."

"**VerteX** is my go to coil cleaner. It's easy to dilute and has the added bonus of being suitable for both evaporator and condenser coils. I always carry a bottle in the van."

"You can see the grease and junk falling off the coil as you wait."
